

**CSD Course Map (based on prerequisites)**

**effective fall semester AY 2022-23**

**IMPORTANT NOTES:**

1. CSD 3800 and CSD 4710 CANNOT be taken concurrently.
2. Due to the long prerequisite chain on MATH and statistics, plus the fact that CSD 3900 is offered only in the fall semester (i.e., once per year), students MUST complete MATH 2500 or PSY 2110 no later than the summer of their junior year, so that they can take CSD 3900 in the fall of their senior year. Otherwise, the student's graduation may be delayed.
3. If a student has completed CSD 3410, the student CANNOT take CSD 4420, because contents of these two classes are very similar. In this case, the students will be waived for the CSD 4410 requirements at the CSD level. However, the student will still need to take a Tier III class (if it is not done yet) to satisfy the University requirements.
4. The changes that will take place starting from the fall semester AY 2022-23 are marked in red.
